

**KITCHENTRAC**®

REMOTE EQUIPMENT MONITORING

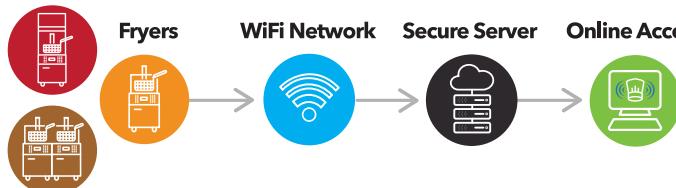

**GILES**  
PROVEN & TRUSTED SINCE 1952

**KitchenTrac Ver1.5**

# Smarter Equipment. Smarter Operations.

*KitchenTrac® seamlessly connects your Giles fryer to the cloud for real-time visibility into equipment health, cooking activity and operational compliance.*

Oversee your fryers in real time using wireless connectivity.

## Disconnected Operations Causing Headaches?

**Limited Visibility:** Are you struggling to verify that standard operating procedures are being followed across every location?

**Reactive Maintenance:** Is the disconnect between on-site staff and maintenance teams driving up service costs and downtime?

**Inconsistent Quality:** Are manual updates to menus and equipment settings causing product variance between stores?

If you answered yes, KitchenTrac® provides the visibility you need to solve these problems.

## Turn Equipment Data Into Operational Excellence

Avoid Equipment Downtime

Identify Trends

Ensure Consistent Quality

Increased Savings

## Operational Compliance

KitchenTrac® gives you automated tracking for oil filtration, boil-outs, and daily data collection.

**Verify that your staff is adhering to cleaning schedules and SOPs without costly store visits, ensuring consistent food quality and safety.**

## Remote Management

KitchenTrac® delivers instant menu/settings push, critical operational alerts, and real-time utilization graphs.

**Gain total control over your fleet. Upload custom menus to fryers instantly and monitor temperature trends to optimize kitchen performance.**

## Preventative Maintenance & ROI

KitchenTrac® provides equipment and utility usage tracking

**Get the visibility required for proactive care. Extend the life of your equipment and identify utility waste to drive bottom-line savings.**

**Powered** by Giles Food Service Equipment.

**Backed by** the KitchenTrac cloud.

**Built for** the Foodservice Industry by Foodservice Experts.

Real Time Monitoring

Operational Issue Alerts

Quickly Update Menu Sets

## Technical Specs and Compatibility

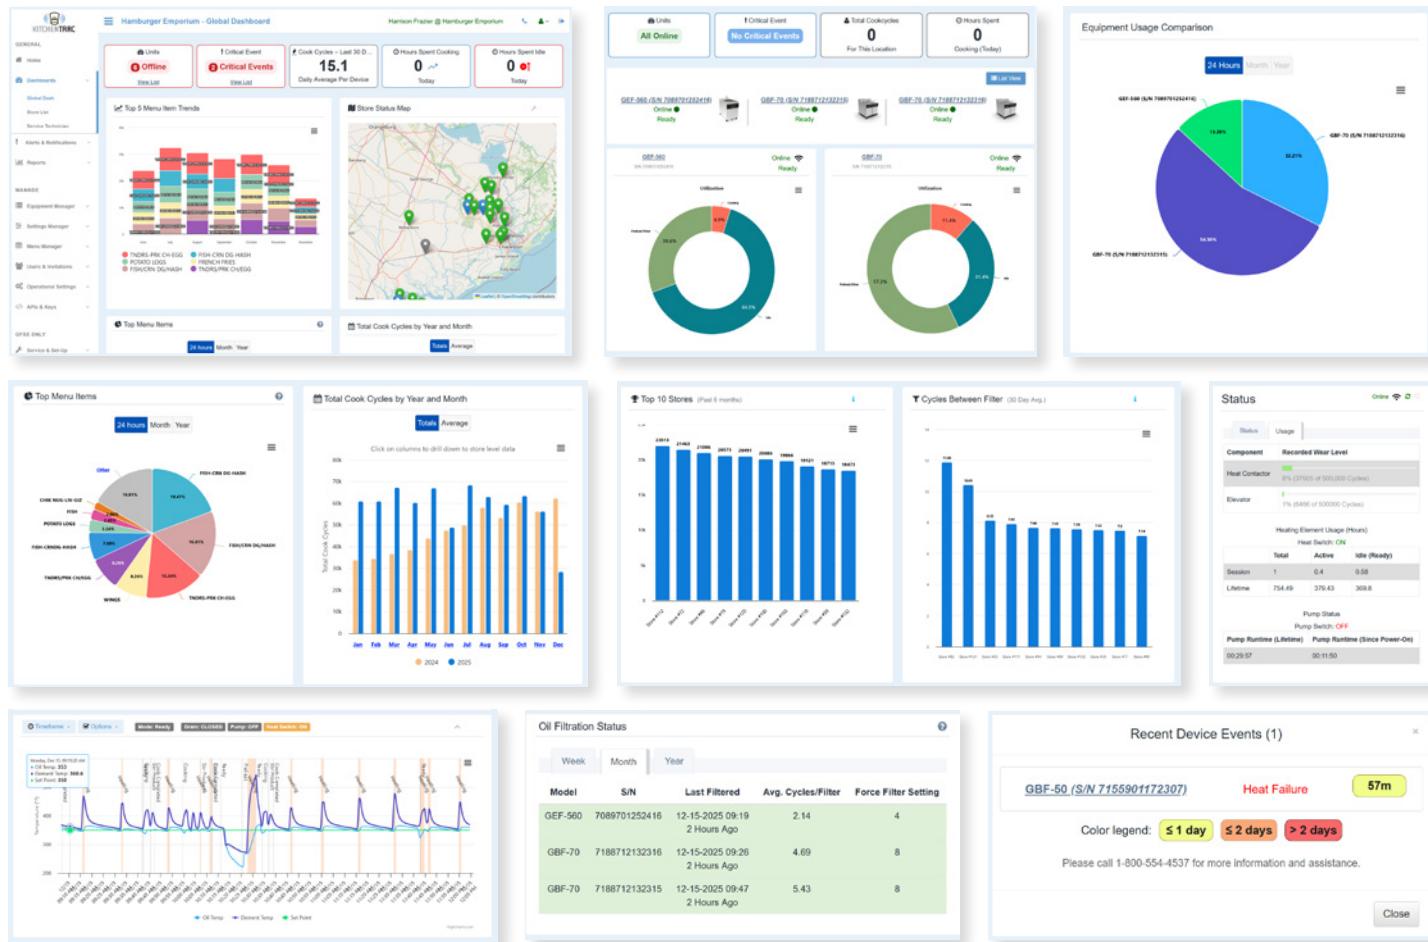

- Universal Compatibility:** Available on all Giles fryer models.
- Retrofit Ready:** Already have Giles equipment? Retrofit kits are available to bring offline units onto the network.
- Simple Setup:** Connecting to Wi-Fi network is fast and easy.
- Integration:** API capabilities available for custom connections—contact your Regional Sales Manager for details.

## Trusted by Leading Foodservice Operators

*"Adding Wi-Fi to our fryers has given us real control over food quality and consistency across every location helping us manage our kitchens at scale. Instead of guessing, we can monitor fryer usage at the store level, push program updates instantly, and fine-tune settings without ever being on site. The connectivity has made it easier to train teams, fix issues fast, and keep standards high."*
